## Dedicated to Satisfaction

Mountain Crane Service has built their reputation on service, quality, safety and a proven track record of delivering services on time and within your budget. Mountain Crane offers a dedicated team of professional, experienced staff accompanied by a fleet of meticulously maintained machinery. In short, Mountain Crane has the resources and expertise to meet your project's needs and exceed your expectations.

From routine tasks to performing heavy and difficult lifts, the Mountain Crane team prides itself in an impeccable record from concept to completion. With a team of highly skilled and knowledgeable staff, Mountain Crane strives to safely deliver service in any project environment. Mountain Crane continues to grow and diversify, expanding its services, ensuring that clients' project requirements are met, providing a quality product while maintaining a safe work environment at all times.

## Power Pole Erection

Mountain Crane Service has valuable experience in power pole erection. We have conquered rugged terrain and harsh weather conditions and been ahead of schedule every step of the way.

Our operators can provide safe, efficient service. Let us add value to your next project.

## Annual Safety Training

Mountain Crane Service employees recently completed their annual MSHA refresher course. Employees attend several safety training sessions throughout the year. These include:

MSHA

Utah Safety Council

Wyoming/Montana Safety Council

Railroad Safety

Site Specific Orientation

Contractor Required Training

## Keeping it Green in 2010

As we all look ahead to 2010, renewable energy will be central to the economic and energy issues in the U.S. The American Wind Energy Association (AWEA) has identified wind power as the second largest source of new U.S. power generating capacity for the sixth year in a row.

While wind makes up only about 2% of total electricity supply, it is one of the largest sources of new power generation in the country, second only to natural gas generation in terms of new capacity built each year since 2005.

*Wind power is identified as the 2nd largest source of new U.S. power generating capacity for the sixth year in a row.*

As Mountain Crane continues to provide equipment for wind farm construction and maintenance throughout the U.S., we look forward to wind continuing as a leading source of power generation. For more information on wind power, check out [www.awea.org](http://www.awea.org).

## Project Walkthroughs

Mountain Crane Service is willing to walk through any upcoming job you may be bidding. We can also look over plans in your office.

Crane type and placement on site can be a key factor in the estimating process. We can provide suggestions that will save you TIME and

MONEY in the long run.

Crane operators are also available to walk through a site before your project takes place.

## Utah's Largest Crane Fleet

Load charts for each of our cranes are available online at [www.mountaincrane.com/fleet](http://www.mountaincrane.com/fleet).

Mountain Crane Service provides a variety of services across the Intermountain West including plant shutdowns, steel, pre-cast panels, heating and cooling units, transformers, pools and hot tubs, demolition, mobile homes, windmills, and bridge girders, to name a few.

Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their CCO Certification. We have a clean OSHA record and take pride in our safety record.

Check out our website at [www.mountaincrane.com](http://www.mountaincrane.com) for more information.

## Crane Safety Training

Mountain Crane Service is continually striving to improve crane safety awareness and procedures. To schedule crane safety training or on-site demonstration for your organization, please contact us at (801) 282-3330. We would be happy to provide training materials for your company.
