February 2010

NSA Data Center

Mountain Crane Service is very interested in participating in the NSA Data Center Project at Camp Williams. For the past year, Mountain Crane has been working with several different subcontractors on the Topaz Data Center in West Jordan. This has included work with SME Steel (steel), Hanson Eagle Precast (precast), and H.W. Farren (rigging) in addition to collaboration with Skanska Building USA as the general contractor over the project.

Mountain Crane Service is registered with CCR and can provide an array of equipment services for the upcoming work on the NSA Data Center project.

We would appreciate the opportunity to provide you a quote.

For subcontract information, please contact Marie Neff at (801) 282-3330 or marie@mountaincrane.com.

Safety in Numbers

Mountain Crane is pleased to announce that we completed **118,358 man hours** in 2009 with **no lost time**. We are happy to say that our employees returned home safely to their families at the end of each day.

We want to thank our employees for their constant efforts to be safe. They continue to watch out for each other and we look forward to another good year in 2010.

Chevron, TIMEC, and Mountain Crane Team Up

Left to Right: Rich Hunt, Mike Charlton, Ted Carvo, Paul Belcher, Jeff Krein, Lon Stam. Not pictured: Todd Ripley.

Mountain Crane presented *Intermountain Contractor's* Best of the Best: Project Management Award for the 2009 Alky Shutdown to TIMEC and Chevron earlier this week. Mountain Crane submitted for this award on behalf of the shutdown team and was recognized out of over 100 project submissions for the 16 award categories.

The three companies teamed up for the successful completion of an intricate turnaround with over 134,000 man hours and no injuries. Each company was recognized for their contributions to the team.

We look forward to many more successful projects with the Chevron, TIMEC, and Mountain Crane team.

Maintenance is Key

"The cost of proper training and maintenance is priceless. These areas should not be on the chopping block when it comes to cutting costs. Time and money spent on the front end can diminish the risk of accidents, injury, or loss of life," (*Modern Contractor Solutions*, March 2008).

Mountain Crane Service has a team of highly skilled mechanics who are available 24/7 to ensure that our equipment is well-maintained and ready to go when customers call. Each mechanic attends hands-on factory training and has

been certified by Manitowoc, Grove, and Tadano technicians. Mountain Crane Service also has a fleet of fully-equipped service trucks to provide mobile service to equipment on site.

"Time and money spent on the front end can diminish the risk of accidents..."

Project Walkthroughs

Mountain Crane Service is willing to walk through any upcoming job you may be bidding. We can also look over plans in your office.

Crane type and placement on site can be a key factor in the estimating process. We can provide suggestions that will save you TIME and

MONEY in the long run.

Crane operators are also available to walk through a site before your project takes place.

Utah's Largest Crane Fleet

Load charts for each of our cranes are available online at www.mountaincrane.com/fleet.

Mountain Crane Service provides a variety of services across the Intermountain West including plant shutdowns, steel, pre-cast panels, heating and cooling units, transformers, pools and hot tubs, demolition, mobile homes, windmills, and bridge girders, to name a few.

Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their CCO Certification. We have a clean OSHA record and take pride in our safety record.

Check out our website at www.mountaincrane.com for more information.

Tower Crane Safety

Tower cranes are used on a variety of projects. Mountain Crane Service has an excellent track record in erecting and dismantling tower cranes in a safe and efficient manner. Our staff carefully measures each site and will prepare a pick plan before providing a quote with the safest, and often most cost-effective, option.

Tower cranes are most dangerous during erection and dismantling. Let Mountain Crane help keep your workers safe.

Crane Safety Training

Mountain Crane Service is continually striving to improve crane safety awareness and procedures. To schedule crane safety training or on-site demonstration for your organization, please contact us at (801) 282-3330. We would be happy to provide training materials for your company.
