**2017 HIGHLIGHTS**

# Ain't No Mountain High Enough

The Liebherr LTM 1220 AT

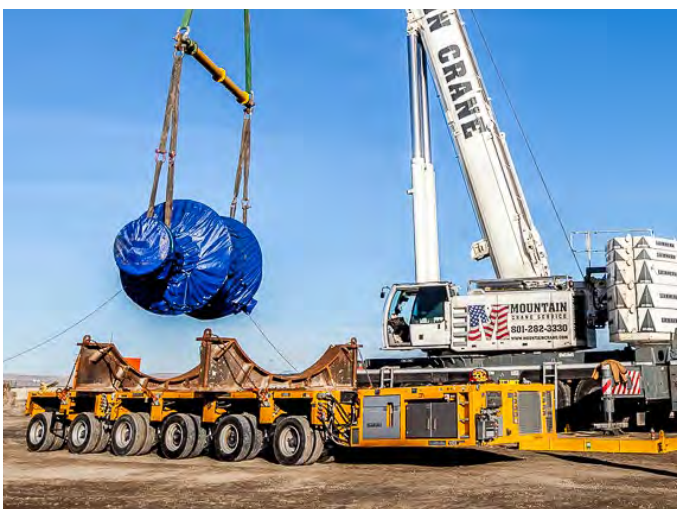

Sometimes the most important ingredient to a successful job is sheer grit! Hats off to our incredible crew who worked in extremely tight quarters & bitter cold temps to get this job done! The over 100 year old piping system above the mouth of Provo Canyon has been under renovation for several months. We came on the scene recently to place multiple pipes and move construction equipment in nearly impossible circumstances. The breathtaking scenery overlooking Utah County and Utah Lake were an added bonus!

# MOUNTAIN CRANE AND MOUNTAIN HEAVY TRANSPORT: YOUR ONE STOP SHOP

Mountain Crane and MHT kept busy between Christmas and New Years picking and transporting rotors from a decommissioned power plant. The six rotors were picked from rail cars with our 500 ton hydro, transported on a 6 line self-propelled Goldhofer, and offloaded with a second 500 ton hydro. Each rotor weighed in at 230,000 pounds. The rotors were wrapped to prevent contamination during transport. The work was completed safely and on time. Thanks to our great team and our great customers for contributing to a unique job.

**Mountain Crane Services** provides a variety of crane services across the Intermountain West including plant shut-downs, steel, pre-cast panels, heating and cooling units, transformers, pools and hot tubs, demolition, wind turbines, and bridge girders, to name a few. Mountain Heavy Transport provides all heavy transport services, including heavy haul, jack-n-slide, and modular platform trailers (Goldhofer). Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their CCO Certification.
